

Important Information

What About Electrical Appliances?

The current in all “Fun Ship” staterooms is 110 volts AC and is capable of handling all normal appliances such as electric razors, hair dryers and curling irons. (Please be certain to unplug the curling iron when not in use.) However, we do not allow the use of heating items like irons or heating pads in the staterooms as these items can be a fire hazard.

Can I bring a radio on board?

You are welcome to bring radios and CD/cassette players for your private enjoyment. However, for the comfort of other guests, we request that headphones or earpieces be used in public areas.

What to do with your valuables.

We're sure you'll want to bring your camera, jewelry and other valuable items on your cruise. However, the ship cannot accept responsibility for any articles left in your stateroom, public areas or packed in your luggage. We suggest you use your stateroom safe or a safety deposit box available at the Information Desk.

Where is Lost and Found?

Unfortunately, important items are sometimes misplaced. If you do lose a personal possession while on board, report it to Lost and Found located at the Information Desk. If you find an item belonging to another guest, please help us reunite it with its owner by turning it in there. Any item that remains unclaimed at the conclusion of the cruise will be sent to our executive offices in Miami.
